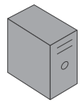
Blockchain Master Symbol Legend

user

malicious user



physical server

workstation

mobile devices

digital wallet

node

node participating in consensus

full node

partial node

lightweight node

record data or transaction record data

off-chain record data or transaction record data

invalid or potentially invalid record data

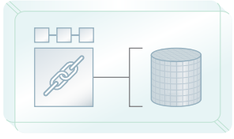
blockchain application logic

distributed ledger

distributed ledger with data highlighted

partial distributed ledger

blockchain node data



blockchain application

application logic

non-blockchain database

non-blockchain database with data highlighted

blockchain

block

block with records and header

block maker

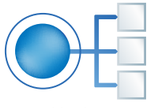
hash engine

automated node deployer

chaining engine

node monitor

node placement monitor



identity federator

live node migrator

consensus processor

node repository

ledger replicator

identity verifier

finger print scanning device

cryptocoins

tokens

hard currency

asset or goods

public key

private key

encrypted message

token

digital certificate

smart contract

hashed time lock contract

user interface/ portal

organization

central authority

current block

orphaned block

sidechain block

genesis block

invalid or potentially invalid block

valid block

blockchain process step

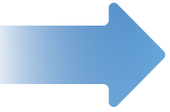
consensus-related process step

non-blockchain system or program boundary

consensus algorithm

conflict symbol

emergency condition



transition arrow
